RE: Approval of the SATAjet RP Spray Gun under Rule 4602

Dear Mr. Bunk:

The San Joaquin Valley Air Pollution Control District (District) has received your request for approval to sell the SATAjet RP and RP Digital 2 spray guns within the jurisdiction of the District. We have reviewed the test results you submitted to the South Coast Air Quality Management District and their approval of these spray guns. Based on this review, we have determined that the SATAjet RP and RP Digital 2 spray guns are approved for use under District Rule 4602, Motor Vehicle and Mobile Equipment Coating Operations, pursuant to Section 5.6.4. This approval is subject to the following conditions, consistent with the South Coast AQMD's approval:

1. SATA Farbspritztechnik GmbH & Co. KG shall supply written notification with each SATAjet RP or RP Digital 2 spray gun sold or distributed for use within the jurisdiction of the San Joaquin Valley Air Pollution Control District that the spray gun is only approved for the application of coatings subject to Rule 4602.
2. This approval is only valid if the air pressure supplied to the SATAjet RP and RP Digital 2 spray guns is equal to or less than 35 psig. SATA Farbspritztechnik GmbH & Co. KG shall supply written notification with each SATAjet RP and RP Digital 2 spray gun sold or distributed for use within the jurisdiction of the San Joaquin Valley Air Pollution Control District that the maximum air pressure supplied to the spray gun shall not exceed 35 psig.
3. SATA Farbspritztechnik GmbH & Co. KG shall supply a SATA air micrometer with gauge 0/8455 (product number 27771) modified to clearly identify the maximum allowable spray gun inlet air pressure with each SATAjet RP spray

David L. Crow

gun sold or distributed for use within the jurisdiction of the San Joaquin Valley Air Pollution Control District. The required modification shall provide a visual confirmation that the maximum allowed air pressure is 35 psig such as color coding the gauge to make the area of the gauge at and below 35 psig green and the area of the gauge above 35 psig red or other design approved by either the San Joaquin Valley Air Pollution Control District or the South Coast Air Quality Management District. SATA Farbspritztechnik GmbH & Co. KG shall supply written notification with each SATAjet RP spray gun sold or distributed for use within the jurisdiction of the San Joaquin Valley Air Pollution Control District that the SATA air micrometer with gauge 0/8455 (product number 27771) modified as described above shall be attached to the spray gun and be in good working condition whenever the spray gun is in operation.

4. This approval is only valid if during actual operation the SATAjet RP spray gun is equipped with a properly operating SATA air micrometer with gauge as described in Condition number 3.
5. SATA Farbspritztechnik GmbH & Co. KG shall add a clearly visible permanent label specifying that the inlet air pressure shall not exceed 35 psig to all SATAjet RP Digital 2 spray guns sold or distributed for use within the jurisdiction of the San Joaquin Valley Air Pollution Control District.
6. This approval is only valid if during actual operation the SATAjet RP Digital 2 spray gun is labeled as described in Condition number 5.
7. This approval is only valid for the SATAjet RP and RP Digital 2 spray gun model tested.

We appreciate your cooperation in this matter. Should you have any questions regarding this approval, please contact Jim Swaney of Permit Services at (209) 557-6400 or by e-mail at jim.swaney@valleyair.org.

Sincerely,

Seyed Sadredin
Director of Permit Services
